THE MERCED ALMOND (See Description Inside)

1958-59

## *Catalog Price List*

FRUIT TREES • NUT TREES • BERRIES  
SHADE TREES • GRAPE VINES

**THE BURCHELL NURSERY**

Office & Salesyard: McHenry Ave., 4 Miles North  
Rt. 6, Box 1500 • MODESTO, CALIF. • Lambert 3-1834

## *Season's Greetings -- 1958-59*

One of the most important problems facing any grower who expects to plant an orchard is to decide what to plant. Since fruit growing is a business, it is only natural to think first of market outlook, and plant the kind that appears to have the best future.

But the old rule in orcharding, which we believe is still good in most cases, is to plant the kind of trees that do best on your own land. Prices go up and down, but the grower who plants the fruit that is best adapted to his own soil and climatic conditions is the one who produces heavy tonnages of quality fruit — and he usually comes out on top.

Come in and talk over your planting problems with us. Our field men are always available to inspect your land, and give you conscientious advice.

*Irvin M. Burchell*

### **TERMS OF SALE**

**DELIVERY.** Our trucks run, during the planting season, throughout the San Joaquin and Sacramento Valleys. Truck deliveries are made without charge in this area. If necessary to ship your order by rail or motor express, we ship collect, and make no charge for packing. Growers are more than welcome to call and take delivery of their orders at our sales-yard. Our shipping and delivery season runs from early in December until the last of March.

**QUALITY and CONDITION.** We take pride in growing and delivering quality nursery stock. However, if any defective trees or vines are found which may have escaped our graders; or if any stock arrives in defective condition, we ask you to notify us within ten days of receipt of shipment. We will then replace, or refund the purchase price of such defective trees or vines.

**TERMS and PRICES.** Terms are net cash. All prices in this catalog are subject to change without notice.

**INSPECTION.** California State Law provides that all nursery stock must be inspected by County Agricultural Commissioner at county of destination immediately upon receipt thereof. We guarantee our stock to pass inspection, and will stand any loss occasioned by its failure to do so.

**LIABILITY.** We use every care in the selection of budwood and the growing of nursery stock in order to have it true to name. We will replace, or refund the purchase price for any stock which may prove untrue. Our liability for this, however, or any other cause whatever, is limited to a sum no greater than the original purchase price.

## **THE MERCED ALMOND**

PLANT PAT. 1730

(See Front Cover)

The Merced is a papershell almond that blooms with Nonpareil, and is a good pollinizer. Its cracking percentage is among the highest of all commercial varieties; which means top, or near top prices for the nuts.

One of the outstanding features is its early and heavy production.

We are much impressed with Merced, and would use it as a pollinizer in preference to any other variety. We suggest for new orchards, planting two-thirds Nonpareil and one-third Merced. Assuming good soil and orchard management, such a combination would result in fine production; and 100% papershell nuts—the kind that bring top prices. (Royalty 50c per tree.)

---

## **THE ROSE NECTARINE**

PLANT PAT. 1421

This year the Rose made a name for itself as the finest of all freezing nectarines. With its delicious true nectarine flavor, and white freestone flesh, it was made into a superb frozen product. At the present time a Fresno County freezer is anxious to contract for commercial tonnage at good prices.

The Rose is also a good shipper, and its striking color gives it exceptional "eye appeal" in the market. Since we first observed the Rose six years ago, it has never failed to set a good crop. It is a good early market fruit, ripening one week after John Rivers. (Royalty \$1.50 per tree.)

---

## **THE MARIGOLD NECTARINE**

PLANT PAT. 1724

The Marigold is a large, beautifully colored freestone nectarine with yellow, firm flesh; making it a fine shipping and market variety. The trees are good producers, and the fruit ripens in August, about the same time as Late Le Grand.

Our own orchard is just starting to bear, but the fruit so far has brought excellent prices, and we expect the Marigold to be a real money maker. (Royalty \$1.50 per tree; 100 or more trees only.)

## PRICES - JUNE BUDS

### PEACH, ALMOND and NECTARINE TREES

(The following prices are for commercial lots.  
Please see prices for Home Orchard trees below.)

PLEASE ORDER IN MULTIPLES OF 50

## REGARDING BUDWOOD

For the past six years, the State Department of Agriculture has inspected the orchards from which we take budwood. This is done in order that we may be sure all budwood trees are free from serious virus diseases.

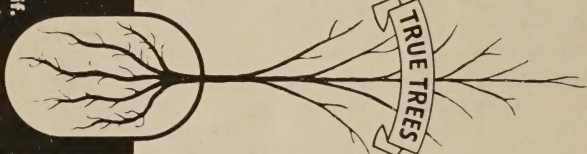

Such virus inspection is in addition to our own selection of heavy producing, true to type trees of each variety. We welcome inquiry about the bud source of any variety we grow.
